

## IT Apprentice

Technical

Closing: Wednesday 10th August 2022

[Apply Now](#) <sup>[1]</sup>

Starting salary £16,664 plus benefits

Are you looking to develop your career within the IT profession? Are you looking to expand your skills and gain experience?

Technologically powering this dynamic business is a campus style network with a VMware virtualized Microsoft server infrastructure, supporting a wide range of 3rd party software and in-house developed applications. During the apprenticeship, you will be exposed to a wide range of technologies and systems including hyperconverged servers, VMware, Cisco switches, fibre networking, Wi-Fi, CCTV, and cyber-security.

This opportunity is far from a typical helpdesk-based IT apprentice role and will suit someone looking to gain in-depth and hands-on experience with these technologies in a mixed office and industrial environment.

Day to day responsibilities include:

- Providing IT support to end users, including the support of software, hardware, operating systems and internal systems.
- Maintaining IT records including recording of assets, IT requests, User Accounts, e-mail accounts and general network information.
- Building and deploying computers to users ensuring they are built to the standard configurations and also setup and dispatched with all necessary software and equipment.
- Supporting the campus style network consisting of UTP, fibre and Wireless technologies.
- Providing basic user training as required.
- Studying for a qualification with Weston College.

A full driving licence and car are essential due to the size of the site, but business mileage reimbursed.

To apply, please contact the Personnel Department on 0117 982 0000 or click apply above.
