Project cargo

From a single lift of out-of-gauge cargo to complex long-term projects, we have the equipment, facilities and skills to handle your project cargo

Wind turbine blades being discharged at Avonmouth Dock

Regular exports supporting British manufacturers

We work with a wide variety of customers on project cargo from single lifts of out-of-gauge cargo to working with manufacturers and prime contractors to execute complex projects.

We can provide undercover and open storage areas, sites for onsite assembly, the sourcing of heavy transport and crantage. We have cranes capable of lifts up to 150 tonnes as well as good working relationships with external crane hire companies for large mobile cranes.

Transporting unusual cargo to/from the Port can be challenging so we work with customers and the highways authorities to plan the journey between quayside and site. With level access from the quayside to the UK's motorway network directly at the Port, we can eliminate many of the challenges and connect you to all parts of the UK.

To discuss your project's requirements contact us on +(0)117 982 0000 or e-mail our [Commercial team](#) ^[1].
