

THE BRISTOL PORT COMPANY

SOLAS Mass-In-Running-Order (M.I.R.O) Confirmation At Avonmouth Container Terminal

In order to utilise The Bristol Port Company's "Terminal VGM" container weighing service at Avonmouth Dock hauliers must pre-register their Mass-In-Running-Order (MIRO) for their vehicle/trailer with the container terminal. The MIRO that should be supplied will be the mass of the vehicle and its trailer, with its fuel tanks filled to at least 90% of capacity and should include the mass of the driver and all equipment and standard running tools/spares etc. Hauliers must use this pro-forma registration form for the purpose of pre-registration. Further copies are available at <https://www.bristolport.co.uk/trades/containers/solas-vgm> or from the Avonmouth container terminal.

A register of hauliers and their vehicles/trailers with applicable registered MIROs will be maintained at the terminal and the process can be advised by speaking with the terminal manager or looking on The Bristol Port Company website.

The declaration and accuracy of the MIRO on this form is the responsibility of the haulier and any errors or omissions must be advised to the terminal at the earliest possible opportunity. The Bristol Port Company is unable to, and is not obliged to, verify or make any enquiry into the accuracy of the MIRO supplied. **The MIRO must therefore be kept up to date by the Haulage firm / Shipping line with any changes being notified promptly in writing to the terminal manager at the Avonmouth container terminal.**

The Bristol Port Company will be entitled to rely on the MIRO supplied from time to time in respect of any vehicle/trailer using the container weighing services and accepts no liability or responsibility for any costs, expenses, claims and liabilities arising directly or indirectly out of any inaccuracy in the MIRO, and the haulier will indemnify The Bristol Port Company and hold it harmless from and against any and all such costs, expenses, claims and liabilities.
